Product

Characteristics

Metal spray with 95% pure zinc powder for cold galvanization of all metals. Fast drying and waterproof after 10 minutes, can be painted after 12 hours at room temperature.

Applications

- Renovation or finishing of hot galvanized surfaces, damaged by welding, drilling or cutting.
- Anti-corrosion layer on steel structures. Protection of welded parts, structures, ...

Use

- Sand first if necessary.
- After releasing the mixing ball, shake well before use.
- Apply from ± 30 cm on a clean, dry and rust-free surface.
- 2 thin layers give the best results.
- After use, empty the nozzle, spraying with the can upside down.
